

2nd July 2008 'Chemistry at Work' University of Teesside
Sponsored by the Royal Society of Chemistry

Presentation title: Pharmaceuticals

This presentation was given by Glaxo Smith Kline.

<http://www.gsk.com/index.htm>

This presentation was interesting because we found out how the pH testing that we do in school is related to the manufacture of medicines, toothpaste, Lucozade and vaccines.

The photograph above shows us using acids to remove corrosion from coins.

The 'Chemistry at Work' day was a useful experience because it has given me an insight into how science and chemistry are involved in making the things we use every day.

Thank you very much for putting on this day. It was good fun and we would love to do it again. Thanks to the Royal Society of Chemistry.

St Michael's RC School, Billingham.
