

2nd July 2008 'Chemistry at Work' University of Teesside
sponsored by the Royal Society of Chemistry

Presentation title: Alternative ways to communicate.

**This presentation was given by the Medical Physics
department**

This presentation was interesting because we found out different technologies have been developed to help disabled people to communicate with their carers.

The 'Chemistry at Work' day was an interesting experience because it made me realise how a person with a physical difficulty lives their daily lives and how science can help those with disabilities.

Thank you for the day.

Scott Alexander, St Michael's RC School, Billingham.
