

2nd July 2008 'Chemistry at Work' University of Teesside
sponsored by the Royal Society of Chemistry

Presentation title: Engineering a wheelchair.

This presentation was given by the Medical Physics
department

This presentation was interesting because we found out how engineering has helped paralysed people to become independent. The chin control was difficult to learn. Trying it out was great fun.

The 'Chemistry at Work' day was an interesting experience because it made me realise how lucky I am to be healthy and brought me back to reality. The day gave us a different perspective on what science can do.

Thank you for the day.

Katherine Sykes, St Michael's RC School, Billingham.
