

2nd July 2008 'Chemistry at Work' University of Teesside  
sponsored by the Royal Society of Chemistry

**Presentation title: Blood pressure survey.**

**This presentation was given by the Medical Physics  
department**

This presentation was interesting because we found out the value of our blood pressure and how to keep it healthy. The photographs above show our group using a digital meter to do the test.

**The 'Chemistry at Work' day was an interesting experience because I found out about important it is to eat a healthy balanced diet and what can happen if you don't.**

Thank you for the day.

Ruth Bertram, St Michael's RC School, Billingham.
