

2nd July 2008 'Chemistry at Work' University of Teesside  
sponsored by the Royal Society of Chemistry

Presentation title:  
Importance of pH tests and  
neutralisation reactions.

This presentation was given by the Hartlepool Power Station

This presentation was interesting because we could take part in the practical work. The university laboratories and apparatus were very modern. The young women chemical engineer was a good role model for us to see.

The 'Chemistry at Work' day was an interesting experience because it made me realise how lucky I am to have a modern university close to where I live.

Thank you for the day.

Laura Mack, St Michael's RC School, Billingham.
