

2nd July 2008 'Chemistry at Work' University of Teesside
Sponsored by the Royal Society of Chemistry

Presentation title: Chemistry at Work

The presentations were interesting because we found out how our local university can help us to qualify for unusual jobs some of which can command a very good salary. A 25 yr old engineer can earn £34,000 a year.

The 'Chemistry at Work' day was a useful experience because it has given me an insight into how science and chemistry are involved in making the things we use every day, in keeping us healthy and providing our power.

Thank you very much for putting on this day. It was good fun and we would love to do it again. Thanks to the Royal Society of Chemistry.

Yours truly, year 9 students, St Michael's RC School, Billingham.
